

## Africa in Science (AiS)

DataHub | DataBase | ThinkTank

*Creating a data-driven mechanism to uncover  
under-researched topics in Africa.*

Our online **datahub** unveils the numbers and trends behind the scientific research progress of African countries.

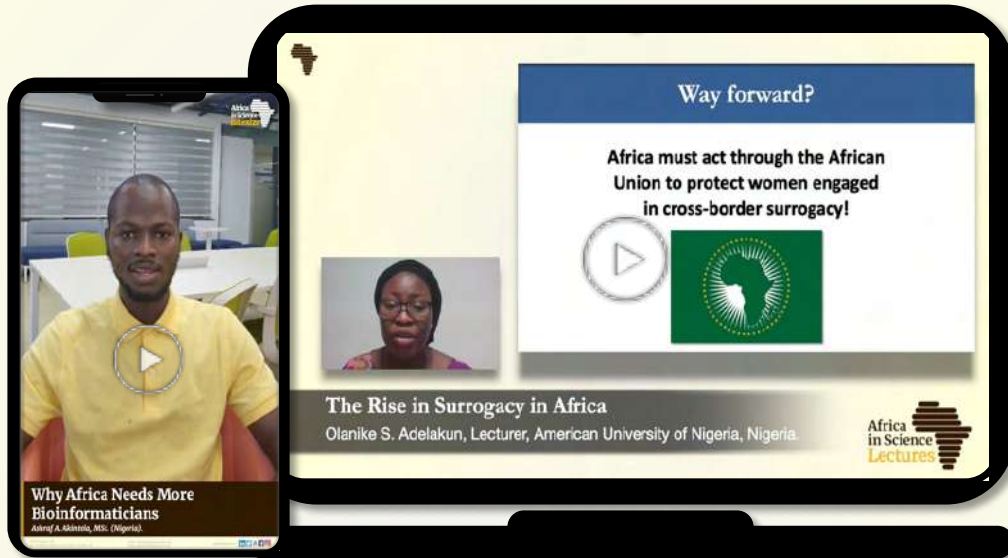

Our **searchable database**  
tracks the output of universities  
and research institutes in  
**Africa.**

Our **index** reflects the impact of human development and socio-economic status on research output of African countries.

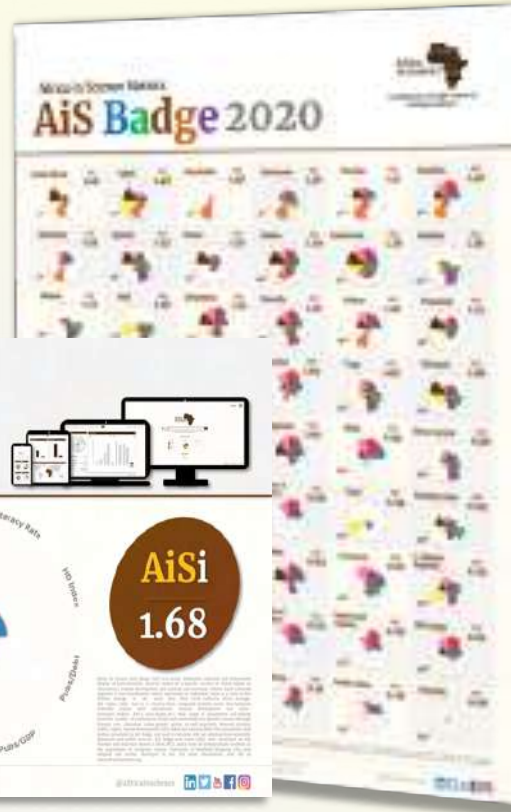

Our **badge** visualizes the impact of human development and socio-economic status on research output of African countries.

AiS *lectures* & *bitesize* videos bring to the fore under-researched and neglected scientific research topics in Africa.

Our *infographics* articulate and showcase the impact and scientific research performance of African countries.

Our ***annual reports*** aim to evaluate and rationalize the recent rise in scientific research progress in Africa.
